Course or Curriculum Development

05/2022 - Present	FPH 7511, Health Promotion Messaging and Advocacy, Graduate (Masters, Ph.D., Pharm.D., etc.), Wayne State University <i>I was responsible for the developing the course as a required part of the Public Health Practice Concentration. I developed lectures and activities to cover principles and practices of health promotion messaging and the role of health advocacy in tackling health inequalities</i>
08/2019 - 12/2019	FPH 7270, Applied Research Methods in Urban Public Health, Graduate (Masters, Ph.D., Pharm.D., etc.), Wayne State University <i>I was responsible for developing the lecture content for 3 full 2.5 hour class sessions on Qualitative Research Methods for this course. I developed the lecture materials, selected the class readings, developed an assignment (and developed the rubric I used to assess students' performance), developed multiple choice and short answer essay questions on qualitative methods for the midterm exam, and attended and evaluated students' group presentations.</i>
01/2017 - 08/2017	Science of Team Science Training, Graduate (Masters, Ph.D., Pharm.D., etc.), Wayne State University <i>Along with Dr. Elizabeth Towner of DFMPHS and Dr. Todd Leff of Pathology, we expanded the WSU DOTS Scholars Program from a team science training group with the 4 2015-2016 DOTS Scholars graduate research assistants to a "seminar" series with the 4 2016-2017 DOTS Scholars (2 returning Scholars and 2 new Scholars) and the 4 RoBUST Postdoctoral Fellows (led by RoBUST Co-Chair Dr. Deborah Ellis of DFMPHS). We built upon 2015-2016 DOTS-focused model to develop a year-long team science curriculum with monthly, 1 hour meetings. The goal was to introduce graduate students and postdocs to Team Science research and the Science of Team Science. Through a mixture of didactics/lectures and experiential learning sessions, we sought to describe and give hands-on training in: the science of team science, forming and maintaining team science collaborations, measuring success and outcomes, seeking team science focused jobs, and presenting and discussing trainees' own or others' research for multiple audiences. The ultimate goal of this seminar series is to develop it into a fully recognized academic course to be taken by future T32 trainees and anyone interested in strengthening their team science skills.</i>
