Title: Advancing Equity in Cancer Digital Inclusion: Investigating Provider Race and Age Biases and Older Black Patients' Uptake of Health-Related Digital Tools, The major goal of this study is to extend implicit racial and age prejudice research into digital inclusion. Specifically, we seek to determine if oncology providers' implicit racial prejudice may influence their recommendations of digital support tools to their Black patients and Black patients' subsequent uptake of those tools.

Title: The Center for Cancer Health Equity and Digital Inclusion (CCHEDI) , The primary objective of CCHEDI is to address digital inclusion disparities that adversely affect Black individuals diagnosed with cancer and investigate digital inclusion interventions at the level of the community, the cancer center, the oncology clinician, and the patient, survivor, or caregiver. CCHEDI includes three research projects (sub-awards). Dr. Dailey will be a co-investigator for Project 3, "Advancing Equity in Cancer Digital Inclusion: Investigating Clinician Bias and Black Patient Uptake of Health-Related Digital Tools," which will be the first study to examine the association between providers' implicit racial bias, the extent to which they recommend digital solutions to Black patients, and the impact on Black patients' use of digital tools.
